

BAR HOLE SAMPLER 3-IN-1 TOOL

Heath Consultants and Sensors, Inc. will release groundbreaking bar hole quantification technology to the utilities industry. This expanded partnership will position Heath as the exclusive provider of this technology in North America.

This new collaboration builds on an already successful partnership, with Heath serving as an authorized distributor of Sensors, Inc.'s industry-leading SEMTECH® HI-FLOW 2 product.

Packed with an array of features, the product line will encompass two models offering benefits such as pinpointing, quantification, and purging.

sensors

FEATURES

- Methane Concentration Measurements (0.03 to 100%)
- Pinpointing (Small Internal Sample Pump)
- Quantification
 - Flow rate in CFM
 - % gas concentration
- Purging
 - 0.75 CFM Internal Pump
 - 3 CFM (External Compressed Air)
- Weight < 10 lbs.
- Calibration, Configuration Utilities

User Interface

- Wi-Fi Web-Based Graphical User Interface
- Pinpointing, Quantification and Purging Graphical Utilities
- 1 Hz Data Recording
- Calibration, Configuration Utilities
